AI Code Review Quality Evaluator

Evaluate whether generated code is correct, secure, maintainable, and faithful to the requested behavior.

Before you begin

- Complete every row for every case ID.

- Use the evidence grid labels when naming an image region.

- Write concise, specific reasons that another reviewer can audit.

- Do not share prompts, images, answers, or completed work outside the platform. Sharing responses violates platform terms and may result in account suspension or a permanent ban.

Three sections in every packet

Section 1 records your corrected judgement, confidence, and escalation decision. Section 2 records the evidence and competing interpretation. Section 3 records the summary item and candidate response assessment.

Section 1 / Corrected judgement

What to enter

- Corrected judgement: choose the label that best matches the evidence and task rules.

- Confidence: choose High when the evidence is clear, Medium when reasonable ambiguity remains, or Low when the image or context is insufficient.

- Escalation: choose No when you can decide consistently, or Yes when the case needs policy or specialist review.

Case ID	Corrected judgement	Confidence	Escalation	Short reason
CODE-MM-001				
CODE-MM-002				
CODE-MM-003				
CODE-MM-004				
CODE-MM-005				
CODE-MM-006				
CODE-MM-007				
CODE-MM-008				

Section 2 / Evidence and reasoning

What to enter

- Evidence region: list stable grid labels such as 2B or 2B, 2C.

- Visible evidence: describe only what can be seen or read in the image.

- Competing interpretation: state the strongest alternative reading of the evidence.

- Rationale: explain why your judgement is better supported than the competing interpretation.

Case ID	Evidence region	Visible evidence	Competing interpretation	Rationale
CODE-MM-001				
CODE-MM-002				
CODE-MM-003				
CODE-MM-004				
CODE-MM-005				
CODE-MM-006				
CODE-MM-007				
CODE-MM-008				

Section 3 / Response assessment

What to enter

- Summary item: name the exact claim, step, or response element being assessed.

- Candidate response: quote or paraphrase the relevant response, then record whether it is supported, unsupported, incomplete, unsafe, or otherwise incorrect according to this role.

- Keep the explanation tied to the supplied case and image. Do not infer facts that are not available.

Case ID	Summary item	Candidate response	Assessment	Reason
CODE-MM-001				
CODE-MM-002				
CODE-MM-003				
CODE-MM-004

Reference image and evidence locator

Use the numbered grid below consistently in Section 2. A stable region is a grid label, not a vague phrase such as 'near the middle'.

CODE-MM-001

Evidence locator for CODE-MM-001: use the smallest grid cell that contains the relevant evidence. If evidence spans cells, list all of them.

1A	1B	1C	1D
2A	2B	2C	2D
3A	3B	3C	3D
4A	4B	4C	4D

CODE-MM-002

Evidence locator for CODE-MM-002: use the smallest grid cell that contains the relevant evidence. If evidence spans cells, list all of them.

1A	1B	1C	1D
2A	2B	2C	2D
3A	3B	3C	3D
4A	4B	4C	4D

CODE-MM-003

Evidence locator for CODE-MM-003: use the smallest grid cell that contains the relevant evidence. If evidence spans cells, list all of them.

1A	1B	1C	1D
2A	2B	2C	2D
3A	3B	3C	3D
4A	4B	4C	4D

CODE-MM-004

Evidence locator for CODE-MM-004: use the smallest grid cell that contains the relevant evidence. If evidence spans cells, list all of them.

1A	1B	1C	1D
2A	2B	2C	2D
3A	3B	3C	3D
4A	4B	4C	4D

CODE-MM-005

Evidence locator for CODE-MM-005: use the smallest grid cell that contains the relevant evidence. If evidence spans cells, list all of them.

1A	1B	1C	1D
2A	2B	2C	2D
3A	3B	3C	3D
4A	4B	4C	4D

CODE-MM-006

Evidence locator for CODE-MM-006: use the smallest grid cell that contains the relevant evidence. If evidence spans cells, list all of them.

1A	1B	1C	1D
2A	2B	2C	2D
3A	3B	3C	3D
4A	4B	4C	4D

CODE-MM-007

Evidence locator for CODE-MM-007: use the smallest grid cell that contains the relevant evidence. If evidence spans cells, list all of them.

1A	1B	1C	1D
2A	2B	2C	2D
3A	3B	3C	3D
4A	4B	4C	4D

CODE-MM-008

Evidence locator for CODE-MM-008: use the smallest grid cell that contains the relevant evidence. If evidence spans cells, list all of them.

1A	1B	1C	1D
2A	2B	2C	2D
3A	3B	3C	3D
4A	4B	4C	4D
